

**NMR DISCUSSION GROUP MEETING BIRKBECK COLLEGE.**

**LONDON. 16TH DECEMBER 1992**

**PROGRAMME**

- |              |                                                                                                                                            |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>10.00</b> | Coffee                                                                                                                                     |
| <b>10.30</b> | Welcome - <b>Dr D B Davies (Birkbeck College)</b>                                                                                          |
| <b>10.35</b> | Metallodrugs<br><b>Dr P J Sadler (Birkbeck College)</b>                                                                                    |
| <b>11.20</b> | $^{17}\text{O}$ NMR Studies of Haemoproteins and Synthetic Model Compounds<br><b>Dr I P Gerothanassis (University of Ioannina, Greece)</b> |
| <b>11.55</b> | Lipid Metabolism and Nutrition - in vivo $^{13}\text{C}$ NMR Spectroscopy<br><b>Dr J D Bell (Royal Postgraduate Medical School)</b>        |
| <b>12.30</b> | Lunch                                                                                                                                      |
| <b>14.00</b> | NMRDG Group Business                                                                                                                       |
| <b>14.15</b> | To be announced                                                                                                                            |
| <b>14.55</b> | Gradients and Spectral Editing<br><b>Dr J A B Lohman (Bruker Spectrospin Limited)</b>                                                      |
| <b>15.25</b> | Spin-1/2 Solid State NMR of Organometallic Coordination Polymers<br><b>Professor R K Harris (University of Durham)</b>                     |
| <b>16.00</b> | Tea and close of meeting                                                                                                                   |
