BIRMINGHAM, 15.

25th November 1966.

Dear Norman,

I am enclosing 4 your tickets for the N.M.R.D.F. meeting. As you would have seen from the circulated notices the Group is now a Subject-Group of the Chemical Society. We naturally did not go into this with our eyes closed and your letter on this subject which you sent last April was most helpful and appreciative. The running and general organisation of the Group is exactly as before - membership is not restricted to Fellows of the Chemical Society although you may be surprised that at the April meeting when we requested for signatures to propose the adoption of the Group we had over sixty Fellows of the Chemical Society who signed!

I can assure you that the Group which you did so much to help to walk during your term as its first Chairman will also bear in

mind its originally intended purpose - namely to promote the discussion between N.M.R. spectroscopists.

Shall look forward to seeing you in December.

All best wishes,

Eric Murrey
