

PROGRAMME

N.M.R.D.G. Meeting at University College of Swansea
Wednesday, 22nd March 1967

- 9.45. Welcoming Address
- 9.50. "Deceptively simple ABX spectra of $\alpha\beta$ -unsaturated nitro compounds derived from Carbohydrates."
Dr. J.M. Williams (University College of Swansea).
- 10.15. Discussion.
- 10.25. "The study of the solvation of molecules by N.M.R."
Dr. D.A. Wilson (University College of Cardiff).
- 10.45. Discussion.
- 10.55. Coffee.
- 11.25. "Structural Problems in the Pheiaderees".
Professor J.A. Elvidge (University of Surrey)
- 11.55. "The computation of N.M.R. spectra in the presence of chemical exchange. Applications to ring inversions in 7,12-dihydropleiaderees."
Dr. T. Connor (National Physical Laboratory).
- 12.25. Discussion.
- 12.45. Lunch.
- 2.00. Group Business.
- 2.10. "Proton Chemical Shifts in Polycyclic Aromatic Hydrocarbons:J a Comparison of Theory with Experiment"
Mr. C.W. Haigh (University College of Swansea).
- 2.45. "Chemical Shifts in Polynuclear Aromatic Hydrocarbons".
Dr. K.D. Bartle and Dr. D.W. Jones. (University of Bradford).
- 3.05. Discussion.
- 3.20. "N.M.R. of Rotenoids and related compounds".
Dr. D. Whiting (University College of Cardiff).
- 3.40. Discussion.
- 3.50. Tea.
