

THE CHEMICAL SOCIETY

PROGRAMME FOR THE N.M.R.D.G. MEETING AT THE UNIVERSITY OF BRISTOL

WEDNESDAY 2<sup>ND</sup> APRIL, 1969

- 10.30 a.m. Coffee
- 11.00 a.m. The NMR of molecules orientated in liquid crystal solvents.  
A.D. Buckingham, E.E. Burnell and G.P. Caesar (University of Bristol)
- 12.10 p.m. Isotropic Proton Shifts in some paramagnetic complexes.  
C.L. Honeybourne and G. A. Webb (University of Surrey)
- 12.50 p.m. Lunch
- 14.15 p.m. Triple and Multiple Resonance.  
R. Price (Queen Mary College)
- 14.55 p.m. Calculation of line-shapes in the study of NMR exchange systems.  
J. Maher and J. Yandle (University of Bristol)
- 15.20 p.m. Heteroaromatic Phosphines and Derivatives.  
W.A.Thomas (University College of Swansea)
- 16.00 p.m. NMR Studies of some 9,10-Dihydroanthracenes.  
J. MacMillon and E.R.H. Walker (University of Bristol)
- 16.30 p.m. Tea
