

N.M.R.D.G. MEETING

SCIENTIFIC SOCIETIES LECTURE THEATRE SAVILE ROW, LONDON

THURSDAY DECEMBER 16TH 1971

- 10.30 Coffee
- 11.00 Review of Fourier studies of relaxation times. D. Shaw (Varian Associates)
- 11.30 Discussion
- 11.40 T_1 studies of carbon 13, and methods of assignment. J. Feeney (Medical Research Council)
- 12.10 Discussion
- 12.20 Use of pulsed magnetic resonance to study translational motion of molecules. K. J. Packer (University of East Anglia)
- 12.50 Discussion
- 1.00 LUNCH
- 2.00 Group business
- 2.10 The impact of Fourier analysis on nitrogen-15 NMR. E. Randall (Queen Mary College, London)
- 2.30 Some current nitrogen-15 NMR studies. J. Briggs (Queen Mary College)
- 2.50 Discussion
- 3.00 Lanthanide induced shifts in proton and carbon-13 NMR. G.P. Moss (Queen Mary College)
- 3.20 Discussion
- 3.30 New developments in Fourier spectroscopy. T. Keller and R. Price (Bruker)
- 4.00 Discussion
- 4.10 A new barrel magnet NMR spectrometer. J.B. Leane and A. R. J. Arthur (Perkin-Elmer)
- 4.30 Tea
