

## NMR Discussion Group

Thursday 20 December 1979

Scientific Society's Lecture Theatre,  
Savile Row, London

10.00 Coffee

Topic for the Morning: **Multipulse Methods**

10.30 Peter Beynon (Kodak Ltd.)  
"Pulse Sequences and their Effects"

11.35 Steve Tanner (University of East Anglia)  
"Pulse Sequences for High-resolution Rare-spin Spectra of Solids"

11.55 Robert Morrow (University of East Anglia)  
"A Doubly "Selective Pulse Sequence"

12.10 Oliver Howarth (University of Warwick)  
"Multi-frequency  $^{13}\text{C}$  Relaxation Studies"

12.30 Lunch (Committee meets over lunch)

1.40 Group Business

Topic for the Afternoon: **Multinuclear Magnetic Resonance**

1.45 Brian Mann (University of Sheffield)  
"A Review of Studies of Organometallics"

2.45 Robin Goodfellow (University of Bristol)  
"Mercury-199 Measurements: Chemically Useful?"

3.05 Tim Akitt (University of Leeds)  
"Aluminium and Gallium: Probes for Aqueous Solution Chemistry"

3.25 John Kennedy (University of Leeds)  
"Multinuclear Magnetic Resonance for Studies of Borane Chemistry"

3.45 Tea
