

NMRDG MEETING

Muriel Stott Conference Centre, University of Manchester
24th March, 1988

- 10.30 Coffee and Registration
- 11.00 Phase Distortion and Composite Refocussing Pulses
 Dr. A.E. Derome, University of Oxford
- 11.35 High Resolution NMR of Lattices
 Mr. P.S. Parley, Malaysian Rubber Producers' Research Association
- 11.55 ¹³C T₁ and NOE Studies of a Lubricant Related System
 Mr. A.J. Williams, Royal Holloway and Bedford New College
- 12.15 Solvent Suppression
 Dr. P. J. Hore, University of Oxford
- 12.45 Lunch Greenwood Room, University Refectory
- * * * * *
- 14.00 Techniques for Localised Spectroscopy
 Dr. J.A.B. Lohman, Oxford Research Systems / Philips
- 14.40 The use of 2-deoxyglucose as a marker of intracellular pH
 Mr. K.J. Brooks, St. Thomas's Hospital, London
- 15.00 NMR Studies of Porous Silicate Gels
 Mr. T. Pritchard, University of Durham
- 15.20 Strong Coupling and the Nuclear Overhauser Effect
 Dr. J.H. Keeler, University of Cambridge
- 16.00 Tea
